

100 % РАЗРАБОТАНО И СДЕЛАНО HAIMER В ИГЕНХАУЗЕНЕ  
100 % DESIGNED AND MADE BY HAIMER IN IGENHAUSEN

was able to transfer the know-how and knowledge from tool holders to the cutting tools.

The customer can only take full advantage of the accuracy of our tool holders if the runout accuracy of

the cutting tool features a correspondingly high quality grade. Thus HAIMER becomes more and more a **system provider in the field of metal cutting.**

The HAIMER Power Mill series from diameter 6 mm to 20 mm respectively, is

by default equipped with the well-known Safe-Lock™ shank. Convince yourself and unite best runout accuracy, vibration-free running and best cutting parameters with absolute process reliability due to the patented Safe-Lock™ system by

using HAIMER tool holders and end mills. For entry at a more reasonable price point, you can look to our Basic Mill line.
